Education

- 2017 – 2019 📌 **Yandex School of Data Analysis**
Computer Science department.
- 📌 **M.Sc. Applied Mathematics and Computer Science, Moscow Institute of Physics and Technology (State University), Russian Federation.**
Thesis title: *Exploring different approaches to Wavenet speedup.*
- 2013 – 2017 📌 **B.Sc. Applied Mathematics and Computer Science, Moscow Institute of Physics and Technology (State University), Russian Federation.**
GPA: 4.63/5.0
Thesis title: *Syllable-level acoustic modeling with convolutional neural networks.*
- Jul 2011 📌 **Summer camp student,**
Summer Multisubject School (Mathematics), Kirov, Russia
- Jul 2010 📌 **Summer camp student,**
Summer Multisubject School (Mathematics), Kirov, Russia
- Jul 2009 📌 **Summer camp student,**
Summer Multisubject School (Mathematics), Kirov, Russia
- 2002 – 2013 📌 **Student, magna cum laude,** High School №82 named after F.I. Dubovitsky, Chernogolovka, Russia

Employment

- July 2016 – 📌 **Deep learning engineer,** Tinkoff Bank
Work in speech recognition and synthesis team.
Throughout the years at the company had different roles:
- Deep learning engineer: trained deep learning models for ASR (using Tensorflow, Pytorch)
 - Backend developer:
 - wrote backend services (in C++ and Golang) that provide our SaaS speech recognition and synthesis - Tinkoff Voicekit
 - optimized deep learning models for speech synthesis to be used in production
 - participated in launch of Tinkoff voice assistant - Oleg
 - Lead developer: managed a team of backend developers for Voicekit
- At the moment I am a deep learning engineer.
I train deep learning models for ASR.

Skills

Languages	■ English - C2 level for reading writing and listening, B2 for speaking French - A1 Russian - native
Coding	■ Python, C++, Golang
Frameworks	■ Tensorflow, Pytorch, Tensorflow Serving, TRT Inference Server, Django, OpenGL, Unity.
Technologies	■ Docker, Kubernetes, Helm, Envoy, Nginx, Jupyter, Bash, Git

Projects

Aug 2017	■ Small contribution to Tensorflow Serving. Added padding to BatchinSession to allow for variable-length inputs for recurrent models such as LSTMs.
Feb - May 2017	■ OpenGL maze demo Created OpenGL demo of a maze where you can place portals on walls and move through them - just like in Valve's Portal game.
Feb - Jul 2016	■ Backend developer, getnb.io Worked in a team developing a service that lets you launch machine learning tools such as JupyterNotebook and RStudio in the cloud.

Online Courses, Certificates and Awards

Jun 2017	■ TOEFL iBT Scores: Reading: 27 Listening: 29 Speaking: 19 Writing: 25 Total: 100
Apr 2016	■ Tinkoff Bank ChatBot Challenge , 1st place. MIPT, Moscow Challenge to create tech support Telegram bot for banking.
Feb - Aug 2016	■ Machine learning and Data Analysis Coursera course by MIPT and Yandex
Jan - Feb 2016	■ Android Fundamentals Udacity course by Google
Jul - Aug 2015	■ Unity Roguelike Tutorial
